355	\$a Krejnovich, E. A. \$b 1958 \$c Jukagirskij jazyk \$g Moscow-leningrad: Academy of Sciences of the USSR, Linguistics Institute		
355	\$a STRESS \$A "Stress falls on the first or second syllable. In isolated cases it may be the only mark distinguishing words." (p.437)		
355	\$a SYLLABLE \$A (C)V(C)(C)		
355 01	\$A /t, d, s, n, l, l-velarized, r-trill/ are described as "apical."		
355 02	\$A "Further studies will show whether the phonemes /c, j, n-palatal, l/ [or /t-palatalized/, /d-palatalized/, /n-palatalized/, /l-palatalized/--MV] are opposed to the phonemes /t/, /d/, /n/, /l-velarized/ as palatalized hard consonants, or whether they belong to the palatal series." (Krejnovich 1958, p.10)		
355 03	\$A "The phoneme /c/ [or /t-palatalized/--MV] is affricated, but inasmuch as it is voiced as /j/ [or /d-palatalized/--MV] it is difficult to assign it to the affricates." (Krejnovich 1958, p.10)		
355 04	\$A Place of articulation for [x] is not specified, but the symbol used suggests a velar.		
355 05	\$A /o-mid-dot/ is "lightly labialized." (p.435)		
355 06	\$A /o-mid-dot-long/ is "slightly retracted." (p.435)		
355 07	\$A /o-mid/ is "less round than Russian /o/." (Krejnovich 1958)		
355 30	\$A "In comparison with the other vowels, this one [o-mid-dot/] is rarely met with. The phonetic conditions under which it occurs call for further study." (Krejnovich 1958, p.9)		
355 60	\$A /q/ may be realized as [x]. (Krejnovich 1958, p.10)		
355 61	\$A /gamma-uvular/ is realized as [q-voice] after /eng/. (Krejnovich 1958, p.10)		
355 62	\$A /iota, epsilon/ are raised to [i, e] "contiguous to palatal consonants." (p.435)		
355 63	\$A /a-front, a-front-long/ are backed in the environment of uvulars. (Krejnovich 1958, p.9)
